

Hi, I am Connor Jarvis and I am six years old.

I go to school at the Courtyard AP Academy.

When I first came to the Courtyard, it was because I found it hard in mainstream school because I didn't get enough help.

This year I have got better at my learning. The things that have helped me are the ways that teachers teach us is interesting. Also, the adults are always there to help when we need it. Now I am more interested in my learning and my favourite subject is Spanish. I always get excited when I do my work and I love to show Miss Nia to get a tally for raspberry class.

My behaviour for learning is excellent. My target is to have a positive opinion of myself and now I am more confident in my learning. When the teachers tell me that I'm amazing, super and awesome it makes me feel really proud of myself inside.

History is my other favourite subject and I have learned all about the great fire of London. The best trip I have been on is our swimming lessons because

it help me keep health and now I can swim and I couldn't before.
